

EasyInspect with Bright Line How to: Measurement of Cable Lengths

AIB

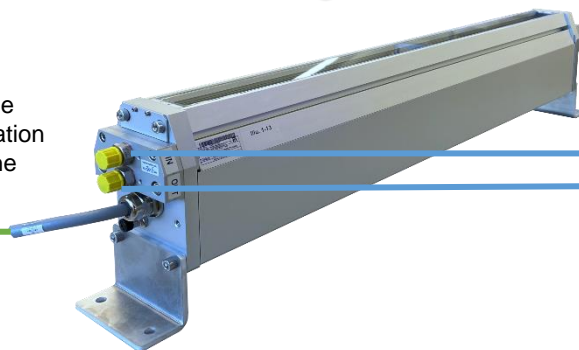

Camera Beam

(16): Measure the length from the end of the camera beam to the connection at the bottom of AIB (the green line).

Bright Line

(13) (15): Measure the length from the two cable connections on the illumination to the corresponding connection at the bottom of AIB (the green line).

Chiller

NOTE: In this illustration, the cooling water and the cable connections are all on the same side, but in some cases, they may be on different sides of the illumination.

No safety margin for cable lengths required.

(4): Measure the length from the cooling water connections on the illumination to the connections on the chiller (the blue line).
